

MATERIALS RESEARCH SOCIETY
Advancing materials. Improving the quality of life.

Strategic Intent – Worldwide Networking

The Materials Research Society is an international organization, with members from around the world. Therefore, to ensure that the Materials Research Society (MRS) offers its members the highest quality information and forums for communication, MRS must engage itself in ways that are appropriate to different regions of the world and that maximize positive impact for materials research worldwide. At the same time, MRS recognizes that people in different parts of the world have different cultures and needs, and that approaches tailored to local conditions often best facilitate the promotion of materials research. Therefore MRS strives to meet its goals (1) by developing and maintaining expertise regarding needs and capabilities in materials research in different regions of the world, (2) by developing and maintaining relationships with people, organizations, and institutions in those regions, and (3) by developing and implementing bilateral projects with partner organizations in those regions to the mutual benefit of the members of MRS and of the partner organization.
